Max Schling's Reputation Builder Grass Seed Mixtures

In a great measure the reputation of a seed house depends upon the quality of the lawn seed it offers, since this is an item purchased by anyone who has any ground at all, and because of the wide variance in the quality of the mixtures offered.

Regardless of brand name, the important feature of a good mixture is that it contains heavy plump seeds from selected grass stocks. Careful blending plays its part in the compounding of a lawn seed mixture. We pride ourselves on the super-quality of our mixtures which have established so great a reputation in the past twenty-five years.

NOTES ON LILY PLANTING

All varieties of Lilies listed on these pages should be planted at a depth of 8 to 12 inches with the exception of *L. Auratum* and *L. Candidum*. Experience has shown that the optimum planting depth for these latter is 2 to 3 inches.

Certain varieties of Lilies, *Speciosum Rubrum* among them, mature so late as to become available in late November. In severe climates, to prevent the ground from freezing, we recommend that the soil be prepared and mulched heavily. Then, when the bulbs arrive, the mulch may be removed and the bulbs planted without difficulty.

MAX SCHLING'S FAMOUS LAWN SEED MIXTURES

In a great measure the reputation of a seed house depends upon the quality of the grass seed mixtures offered. Because it is an item that is almost universally purchased by anyone who has any ground whatever, and because there has been and is such a wide variance in the quality of the lawn mixtures offered, it becomes increasingly important to acquaint the purchaser of grass seed with the history behind a quality mixture.

A grass seed mixture may be offered under any brand name. However, regardless of the name, the basis of all good grass seed mixtures must necessarily be the same. The important feature of a good mixture is that it contains heavy, plump seeds from selected grass stocks that have been grown for the distinct purpose of seed production. Careful blending plays its part in the compounding of a high class grass seed mixture. We have prided ourselves upon the super-quality of our grass seed mixtures which have established a reputation in the past 25 years.

Compare our formulas and prices with those of inferior grade offered elsewhere.
